

# Improve Application Development And Delivery With DevOps

FORRESTER®

## WORKLOADS ARE HEAVILY DEPENDENT ON THE MAINFRAME

**96% of new business initiatives** involve the mainframe for both systems of record and systems of engagement.

**90%** experience challenges with their mainframe application development and delivery:

**39%**  
Long release cycles

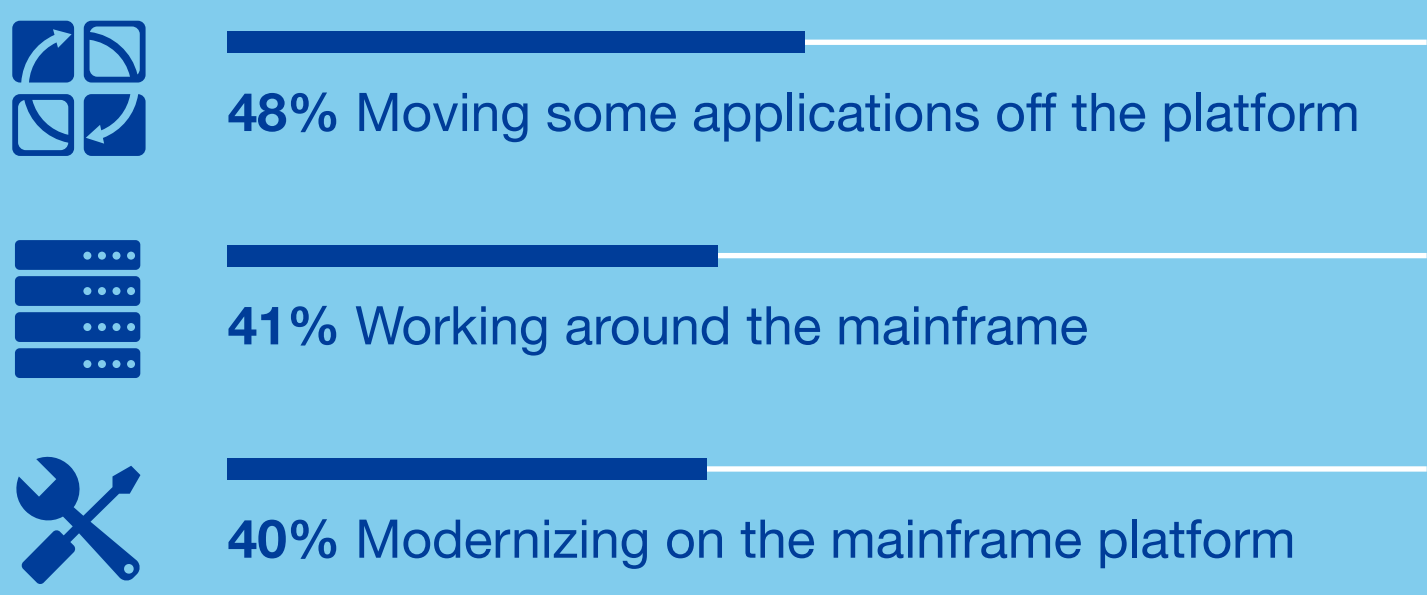

**33%**  
Reduced project scopes

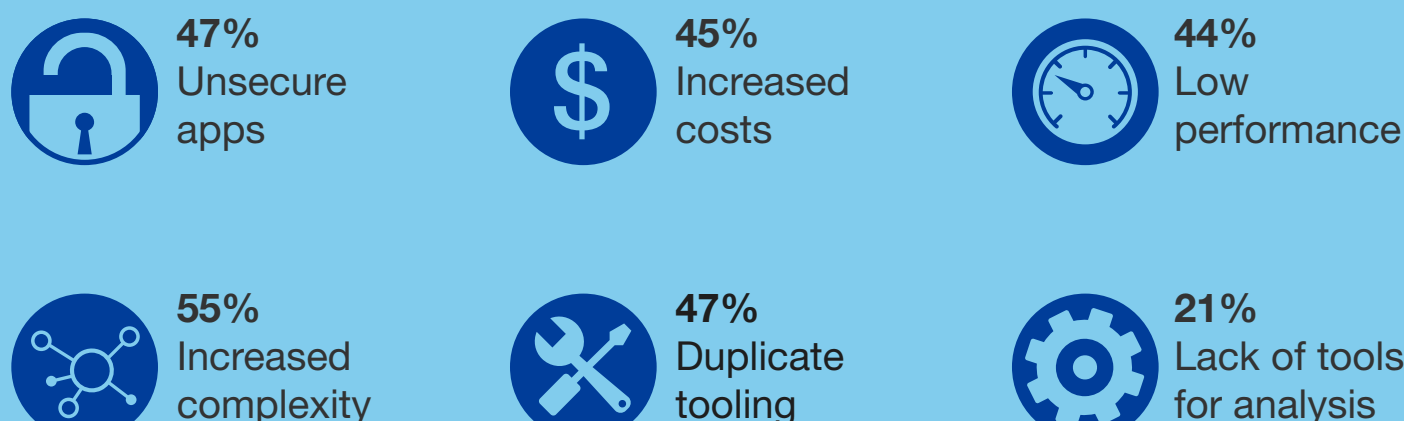

**30%**  
Need to work around the mainframe

Companies are taking steps to solve their mainframe challenges:

But they run into more problems in the process:

## LEVERAGE DEVOPS FOR AN INTEGRATED APP DEVELOPMENT APPROACH

Companies experience benefits as a result of adopting DevOps:

**91%** of app dev professionals leverage DevOps, but only **34%** leverage it across the enterprise:

**Methodology:** In this study, Forrester conducted an online survey of 182 US and EU IT, I&O, and app dev professionals at the director level and above responsible for application development teams.

**Source:** A commissioned study conducted by Forrester Consulting on behalf of Compuware, November 2016

Base: 182 US and EU IT, I&O, and app dev professionals at the director level and above responsible for application development teams
